Kalkomey Enterprises, Inc. has become the leader in recreational safety education since its inception in 1995. We've grown rapidly because of our dedication to delivering top-quality, state-specific products and services on time and within budget.

Kalkomey is the chosen provider of safety education products for agencies in all 50 states for recreational activities including boating, hunting, bowhunting, and operating off-road vehicles and snowmobiles. Our clients include more than 90 state natural resource conservation agencies and safety departments.

Educational Products

Kalkomey has helped millions of Americans learn to boat, hunt, and enjoy other outdoor activities. Kalkomey's training products include more than 300 national and state-specific publications, 150 websites, and great teaching tools.

Classroom courses:

- Instructor guides
- Student manuals and exams
- Classroom PowerPoint® presentations
- Classroom videos

Internet courses: Students study on their own time

Pocket guides: Wildlife identification, outdoor safety, turkey hunting, fish identification, and many more

Safety and law handbooks: Printed, online, and mobile-device versions

Kalkomey's newest products, Event Manager and Certification Manager, provide secure and convenient data management. Whether used alone or together, they can streamline your work and reduce expenses.

Event Management

Kalkomey developed and supports Event Manager, a secure Web-based registration and event management application. Event Manager provides a wide range of services, including tools that allow:

- Scheduling of events by instructors
- Online registration for events by students
- Communication about events between instructors and students
- Grading/recording of event results by instructors
- Online report and certificate generation (no more "bubble forms")
- Transfer of event data to state agencies
- Generating reports that help agencies comply with U.S. Fish and Wildlife Service's federal aid guidelines

Certification Data Management

Kalkomey's newest product, Certification Manager, is a Web-based application that allows agencies to reliably store and manage their student certification data. Certification Manager gives agency staff the power to accomplish the following tasks:

- Search, edit, report on, and export student certification data
- Retrieve data for target marketing associated with recruitment and retention campaigns
- Access certification data on mobile devices for officers in the field
- Issue replacement certification cards and provide the public with the option to order and purchase cards online
- Analyze and report on certification data to identify trends in user demographics and interests
